

Legal Analytics® Enterprise Package

Lex Machina's award-winning Legal Analytics platform helps you win! Win your case, win your negotiation, and win new business with the support of data-driven insights. Over three quarters of Am Law 100 firms as well as firms of all sizes and many of the world's largest corporations use our Legal Analytics to gain previously unavailable strategic insights.

Now, Lex Machina brings you our new Enterprise Package, which gives you access to the company's largest and most comprehensive data set. With over six million cases, you can explore all commercially relevant federal district court cases, rapidly expanding state court coverage, administrative venues, and all federal circuit courts of appeal cases going forward, all without hitting roadblocks or paywalls.

All Available Practice Areas and Venues

Lex Machina’s Enterprise Package includes all federal, state, and administrative cases in our system, plus access to all practice areas and venues added in the future, including all federal circuit courts of appeal cases.

- Over 3 million civil cases in federal district court with enhanced, in-depth analytics available in 18 federal practice areas
- Approximately 3 million cases from 22 state courts
- Millions of already-downloaded documents in federal, state, and administrative cases
- Unlimited users within your organization
- Access to all practice areas and venues added in the future means predictable budgeting, future modules for the current price, and no mid-contract add-ons

The Enterprise Package provides you with access to the most comprehensive set of analytics we’ve ever offered.

Comprehensive Federal Coverage

With Lex Machina’s Enterprise Package, users will have access to comprehensive federal district court coverage for civil cases. Benefits of the comprehensive coverage include:

- Find any case and access up-to-date docket activity
- Conduct keyword searches across all dockets and downloaded documents
- View motion grant/denial rates for a judge’s entire docket
- Search across all federal court cases or narrow down to review practice-area specific insights
- Analyze the complete set of cases for any judge, law firm, attorney, or party

In-Depth State Analytics

Because there is no unified system for state courts analogous to PACER in federal courts, Lex Machina adds its new State Court modules on a court-by-court basis, with an emphasis on strict data quality and integrity. Features include:

- Searching by judge, law firm, attorney name or party
- Timing analytics, trial resolutions, trial damages and trial rulings
- Keyword searching within docket entry text and downloaded documents
- Viewing analytics across all state courts or in one particular court
- Court-specific filters, such as case types and case tags

Use Cases

Lex Machina’s Enterprise Package helps you answer questions such as:

- How many of Apple’s federal cases have a Summary Judgment order?
- What is the median time to trial in Los Angeles County Superior Court?
- How many cases in the Central District of California mention “RICO”?
- What parties has Greenberg Traurig represented and how often?
- How do I get to the case docket for 3:15-cv-03747?

Bottom Line

Lex Machina’s Enterprise Package is the most simple, straightforward package available that grants maximum access to all of the Legal Analytics Lex Machina has to offer, now and in the future.
