3. Accurate Data

Only our patented Attorney Data Engine corrects and adds missing counsel data, producing an accurate record of the appearances of your lawyers and your opponent. By using document-based analysis we include records that other systems simply will never see.

4. Transparent Sources

Only Lex Machina allows you to show your work, and drill down from high level trends to the underlying dockets and documents. We provide you with clear definitions of our case types, tags, findings, damages, and more, so you always know what you're looking at and where the information came from.

5. Instant Results

Our unique Quick Tools make it easy to instantly compare judges, parties, or law firms, create winning motions, explore patent portfolios or expert witnesses, and more.
